Section 1 : Structural Response and Design Structure for Earthquake and Blast Forces	
1. Influence of Foundation Strata on the Earthquake Response of Buildings—P.S. Sandhwalia.	1
2. Basic Principles Underlying Seismic Design of Bridges—by Jai Krishna.	11
3. Analysis of Mechanisms to Decrease Seismic Forces Applied to Structures—by Kiyoo Matsushita and Masanori Izumi.	19
4. Vibration Absorbers for Single Degree Freedom System—by A.R. Chandrasekaran and Y.P. Gupta.	23
5. Stiffening Effect of Braces in a Frame—by N. Gosain and A.R. Chandrasekaran.	33
6. Free Vibrations of Non-Linear System—by A.R. Chandrasekaran and Brijesh Chandra.	47
7. Dynamic Deflection of Multi-storey Buildings During Earthquakes—by A.S. Arya and A. Prakash.	57
8. Behaviour of Non-Linear Single Degree of Freedom Systems Under Blast Loading—by A.R. Chandrasekaran and S.S Saini.	69
9. Structural Damage By Blast from High Explosive Bombs—by P.K. Misra, N.C. Bhattacharjee, M. Balakrishnan and Sampooran Singh.	79
10. Dynamics of a Structure Under Blast Loading—P.K. Misra, S.N. Tewari, B.L. Gambhir and Sampooran Singh.	89
11. Earthquake Damage to Structures Predicted by Travelling Wave Theory—by Merrit P. White.	97
12. Determination of Lateral Stiffness of Infilled Frames by the Finite Element Method—by D.V. Mallick.	101
13. Numerical Analysis of Dynamically Loaded Beam Columns—by R.L. Tucker, J.D. Franklin and J.K. Senter.	115
14. Steel Members for Earthquake Protection—by M.G. Korf.	129
15. Energy Absorption in Systems Consisting of Walls and Frames when Subjected to Vibration—by D.V. Mallick.	137
16. Hydrodynamic Action on Water Tanks due to Earthquakes—by Cristian Bratu.	147
17. Earthquake Type Function Generator—by A.R. Chandrasekaran and S.P. Gupta.	159
18. Free Vibrations of Concrete Arches—by A.S. Arya and S.K. Thakkar.	161
19. Frequency Analysis of Girds Using Difference Equations—by K. Palani-swamy and D.V. Reddy.	173
20. An Experimental Study on the Restoring Force Characteristics in Structural Frames Part I —by T. Odaka.	179

Section 2 : Soil and Foundation Behaviour During Earthquakes

1. Cyclic Triaxial Tests For Studying Soil Behaviour During Earthquakes—by B. Edward Margason, R. Lundgren and J.H. Wilson. 207
2. Dynamic Properties of Soils—by Yong Suk Chae. 219
3. Damping in Soils—by Shamsher Prakash and D.C. Gupta. 229
4. Rheologic Response Spectrum of a Soil—by Robert L. Kondner and Raymond J. Krizek. 241
5. Sub-Soil Stresses and Sub-Soil Collapse—by Julio Ibanez. 263
6. Susceptibility to Liquefaction of Submerged Sands—by R.M. Palit and T.K. Natarajan. 271
7. Static and Dynamic Earth Pressures Behind Retaining Walls—by Shamsher Prakash and Swami Saran. 277
8. Determination of Horizontal Soil Modulus for Cohesionless Soils—by S.L. Agarwal and B.B. Chopane. 289
9. Natural Frequency of Embedded Foundations—by M.R. Mahdva. 309

Section 3 : Design of Dams and other Appurtenant Works in Seismic Zones

1. Dynamic Response of Earth Dams—by W.D. Liam Finn and J. Khanna. 315
2. The Use of Models in Analysing the Effects of Earthquakes on Arch Dams—R.T. Severn and P.R. Taylor. 325
3. A General Method For Determining the Hydrodynamic Action due to Earthquakes on Dams—by C. Bratu. 333
4. Aseismic Design of Earth Retaining Structures—by A.S. Chandrasekaran, R.G. Sulibhavi and E. Sundariya. 351

Section 4 : Wave Propagation, Seismicity and Geological Studies of Tectonic Features Influencing Occurrence of Earthquakes

1. Wave Propagation Response of a Cohesive Soil—by R.L. Kondner. 361
2. Body-Wave Velocities along an Internal Layer—A Two Dimensional Model Study—by D.K. Chowdhury. 371
3. Radiation Patterns for P and SV Waves for Different Values of Poisson's Ratio in a Semi-Infinite Half-Space, Using Reciprocity Theorem—by Umesh Chandra. 377
4. A Seismic Risk Map for the United States—A Progress Report—by S.T. Algermissen. 389
5. Crustal Disturbance in Shivaji Sagar—Lake Area of the Koyna Hydro-Electric Project—by S.K. Guha, P.D. Gosavi, J.G. Padale and S.C. Marwadi. 399
6. Seismicity of the Area Around Delhi—by L.S. Srivastava and J.G. Somayajulu. 417
7. Seismicity of Assam—by A.K.S. Chouhan, V.K. Gaur and R.S. Mithal. 423
8. Seismicity of Rajpur-Mussoorie Region Dehradun District—by B. Singh, G. Singh, P.M. Jalote and S.M. Salapaka. 431
9. Geological Evidences of Quarternary Movements in the Himalayan [Region and Their Seismic Significance—by Pushkar Singh and B.R.J. Rao. 437

10. Geological Studies of Tectonic Features Influencing the Occurrence of Earthquakes in the Eastern Ghats in Peninsular India—by T. Madhusudhau Rao. 443
11. Some Observations on Recent Movements along the Krol Thrust Rajpur, Dehradun District—by P.M. Jalote. 455

Section 5 : Housing in Seismic Zones and Damage during Recent Earthquakes

1. The Earthquake of Peloponnesus April 1965—A Survey of the Greated Damages.—by E. Kokinopoulos and Th. P. Jassios. 459
2. The Capacity of Buildings to withstand Earthquake—An Adequacy Assessment.—by P.S. Sandhwalia and R. B. Gupta. 473
3. Design of Buildings for Controlled Damage during Severe Earthquakes—by P.S Sandhwalia. 489
4. Building Practices in Seismic Zones of North Bihar, North Bengal and Assam—by N. Gosain. 501
